# THE GROWTH OF A WONDERFUL BRAND

## HEINISCH - - SINCE 1825

It is now over ninety years since the first Heinisch Shear was made—  
and that was

### The First Pair of Shears Made in America

To-day Heinisch Brand Shears are in use in every country on the globe.  
Heinisch Shears have been

### Recognized for Over 90 Years

by expert cutlery men as the

### Acme of Perfection

Since the Heinisch Tailor Shears were *invented* they have been in use  
by clothing cutters all over the world, and many are now using the very  
same shear with which their grandfathers earned their living.

Could a brand have retained such a wonderful reputation if the quality  
of that brand were not superior to any other?

Heinisch Shears, in their humble way, have been undoubtedly a great  
factor in showing to the world the wonderful advances which have been  
made in American manufacturing.

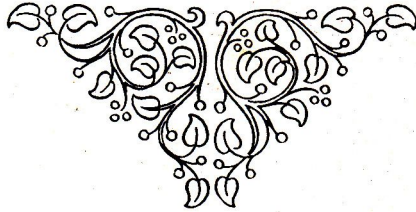

The Heinisch Shear is more generally used by workmen than any other  
shear—and in hundreds of factories no other is ever seen, whether these  
factories are situated in North America, China, Europe or Africa. Heinisch  
Shears are made for the hardest and most continuous use. They are so care-  
fully tempered they will hold their edge, and wonderfully adjusted so that

both blades cut smooth and clean and do not grind one against the other. The handles fit the grasp so comfortably that the worker does not feel the weary muscular cramp that makes the average shear so tiresome.

Every operation in the manufacture of the Heinisch Shear is in the hands of a thorough mechanic—an expert in his line. Before shipping, every article of our manufacture passes a rigid and very exacting test of quality—a test of finish and perfection. And in addition to this every article we make is covered by our unconditional warranty.

## TERMS

Terms Net Cash with exchange on New York.

Accounts not paid within thirty days will be subject to our sight draft.
